Incoming SWE Intern @ J.P. Morgan | Incoming Data Engineer Intern @ BlackRock

PROFESSIONAL SUMMARY

Computer Science student with experience building and deploying production software for real-world clients. Developed a scalable web application for a retail hair business in Australia, improving operational efficiency and increasing sales by over 40%. Strong background in algorithms and problem solving, with competitive rankings in technical challenges. Winner of the Career26 AI Accelerator, presenting work to Goldman Sachs, HG Capital, and Man Group, and finalist at J.P. Morgan Code for Good. Completed a competitive algorithmic trading programme with top-10% cohort performance based on P&L in live trading simulations.

EDUCATION

University of Aberdeen 2023 – 2027
BSc Computer Science

- Relevant Coursework: Data Structures & Algorithms, Database Management, Object-Oriented Programming

SKILLS

Languages	C++, C, Go, TypeScript, OCaml, Zig, kdb+/q, Python
Tools	Git, GitHub Actions, CI/CD, AWS, Docker, PostgreSQL, gRPC, GraphQL, Linux, CMake, Vercel, Bloomberg Terminal
Concepts	Data Structures, Multithreading/Concurrency, Distributed Systems, Performance Optimization, Design Patterns
Other	Competitive Chess, Jazz Saxophone (Tenor/Alto/Baritone)

EXPERIENCE

Freelance Software & Web Developer 2021 – Present
Self-Employed *Remote*

- Built and deployed full-stack client websites using React, Tailwind, and Vercel.
- Developed backend APIs, authentication systems, SQL databases, and Stripe integrations.
- Delivered responsive, maintainable production systems for real clients.

Backend Solutions/Operations Manager 2022 – 2024
Oh My Yum *Remote*

- Owned order-fulfillment pipeline: POS integration, dispatch management, and delivery confirmation.
- Automated workflows connecting POS systems to driver apps and customer notification services.
- Improved operational efficiency via optimized inventory tracking and preparation workflows.

ACHIEVEMENTS & PROJECTS

Jane Street Puzzle Solver – Global Leaderboard (Dec 2025). Ranked solver using algorithmic optimisation techniques.

Career26 AI Accelerator – Winner. Presented software to Goldman Sachs, HG Capital, and Man Group; received interest from a \$5M stealth AI startup.

AI OBS Wrapper. C++/Python tool automating OBS configuration and troubleshooting with LLM integration.

Algorithmic Trading Programme (6 Weeks) – Top 10% of Cohort. Designed and backtested quantitative strategies; implemented execution and risk controls; ranked top 10% by P&L in live simulated trading competition.

J.P. Morgan Code for Good – Finalist. Built Flask backend and deployed cloud infrastructure on AWS and Vercel.
